Miguel Sánchez Fernández

Ingeniero de Software en Globant | Desarrollador Java | Adaptable y Resiliente | Master en Diseño y Gestión de Proyectos Tecnológicos en UNIR

Peru

Extracto

Hi! I'm Miguel Sanchez Fernandez, a professional with experience in various industries, including education, agribusiness, telecommunications, banking and technology consulting. I currently work at Globant as a Java Backend Developer, and my long-term goal is to advance to a Project Manager role.

My key skills include teamwork, adaptability, effective communication and problem solving. In addition, I consider myself a resilient person with leadership skills, empathy and high emotional intelligence. I am enthusiastic about continuous learning and am always looking to stay on the cutting edge in my field by reading, watching videos and participating in relevant courses.

Throughout my career, I have made significant achievements, such as completing a master's degree in design and management of technology projects at UNIR (International University of La Rioja), as well as diplomas in leadership and project management at (MIU City University Miami) which has enriched my skill set and provided me with a solid academic and practical foundation.

Outside of the professional arena, I have a passion for technology, always looking to stay on top of the latest trends, and enjoy creative pursuits such as painting and music. I am also a passionate traveler and lover of photography.

If you are looking for a motivated, committed and creative professional, I am ready to take on new challenges.

Experiencia

Globant

SSr. Java Developer

febrero de 2022 - Present (3 años 4 meses)

Lima, Perú

-Implemented microservices in Spring Boot following RESTful standards and design patterns.

I automated service tests using SOAPUI (integration tests), Postman (API tests) and

Mockito (unit tests).

-Developed key technical documentation for critical processes of the Bank.

-Successfully migrated services from .NET to Java 17.

-Implemented microservices in Spring Boot following RESTful standards and design patterns.

-Executed security scans with Checkmarx.

Implemented scalable solutions using microservices architecture using Spring boot (Java),

reducing load times.

-Developed key technical documentation for critical undocumented processes.

-Developed automated SQL Server scripts that reduced manual processes that took hours.

-Migrated JSP systems to Java with AngularJS and optimized complex SQL Server queries.

NTT DATA Europe & LATAM

Solutions Assistant

junio de 2021 - febrero de 2022 (9 meses)

Lima, Perú

Client (Claro Perú):

I designed and implemented a RESTful microservices architecture using Spring Boot (Java).

Implemented CI/CD pipelines in Jenkins with continuous integration, integrating SonarQube for code quality.

Automated service testing using SOAP UI (integration testing), Postman (API testing) and

Mockito (unit testing).

Creation, review and quality analysis of development documents under corporate standards.

Agricola Cerro Prieto S.A - Página Oficial

Inspira Digital Peru

Fundador

julio de 2017 - febrero de 2021 (3 años 8 meses)

Provincia de Chiclayo, Peru

I.E.P. Santo Toribio de Mogrovejo

Head of Information Technology

abril de 2018 - diciembre de 2018 (9 meses)

Chiclayo - Perú

I led internal technological projects oriented to the modernization and technological security of the educational institution, from its planning to its implementation.

I conducted functional requirements surveys with administrative and academic users,

documenting AS-IS processes and proposing TO-BE solutions using tools such as Bizagi and Visio.

I led the migration of legacy systems to modern platforms, ensuring operational continuity and

optimizing internal processes.

I managed the technological inventory and IT resources, ensuring asset control and availability of critical equipment.

I supervised a direct collaborator, distributing tasks, providing technical mentoring and following up on deliverables.

I coordinated with external vendors and different internal areas to ensure compliance with deadlines, scope and quality of projects.

Implemented IT security practices, including infrastructure improvements for the protection of sensitive data and secure digital operation.

Chancafe Q

Analista de sistema

enero de 2018 - abril de 2018 (4 meses)

Perú

Desarrollé un aplicativo web para la automatización y gestión para apoyar a la gestión de cobranzas en la empresa.
